

R Code	Contents	Output Dataset
ADNI_DataAnalysis.R	(This code is automatically loaded with each code to import ADNI cohort data. Therefore, this code cannot be executed by itself)	-
CrossSiteValidation.R	Average predictive error in cross-site validation of prediction model in participants with A $\beta$ -positivity in ADNIcohort	Result_CrossSiteValidation
SensitivityAnalysis_for_InitialValue.R	Average predictive errors with initial values set to median baseline cognitive scores in ADNI dataset	Result_InitialValue
SensitivityAnalysis_for_SampleSize_and_FollowUp.R	Average predictive error for varying sample sizes and number of data points	Result_SampleSize_FollowUp
